

Toolbase® Control EL-9 Professional

The Toolbase® EL-9 Professional is a tool dispensing machine for small businesses or an alternative control unit for complex systems. The large drawers with flexible partitioning options allow a wide range of uses. All drawers can be locked electronically and thus protect against unauthorized access.

The Toolbase® ATMS CORE basic module is installed on the high-quality PC with a large touch screen. Even the basic module enables permanent availability and optimum C-parts management, but can be easily expanded if required thanks to our modular software structure.

Drawer	Height (mm)	Usable Height (mm)	Storage Space	Notes
